

AR Automation

Send paper, PDF and electronic invoices with Ricoh and its strategic partner Pagero

AR Automation with Ricoh and Pagero

Many businesses underestimate how much manual accounts receivable tasks add up to cost the whole organisation. The good news is that just a few minor changes can boost any AR department towards digital, automated processes that significantly reduce costs and improve cash flow.

Our AR Automation integrates with your current system to automate manual tasks and invoice distribution, even if your customers still require paper or emailed invoices. By joining the Pagero Network, you can connect to all your customers, guarantee accurate data and ensure full traceability of the entire invoice life cycle – all while saving time and money.

Digital

Achieve 100% digital customer invoice distribution from day one

Compliant

Ensure local e-invoicing and tax compliance in all countries where you operate

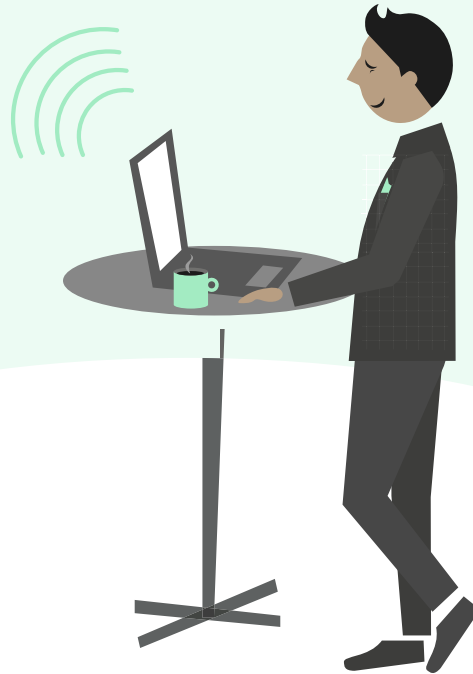

Global

Reach all your customers, regardless of country, platform or provider

Seamless

Integrate with your ERP system to continue operations without adding new interfaces

Digitalise your accounts receivable process

Connect your ERP system to the Pagero Network to distribute all your customer invoices electronically. Guarantee timely delivery and accurate data, regardless of the digital capabilities of your customers.

E-invoicing

Send e-invoices directly to customers, no matter which service provider or network they use.

Mail and email distribution

Ricoh distributes your paper and emailed invoices to customers who aren't e-ready.

Government hubs and interoperability

Connect to hundreds of government infrastructures and e-invoicing platforms.

Peppol access

Fast, secure, borderless trade in all Peppol countries.

Achieve local compliance – globally

Pagero Compliance solutions ensure your AR process meets local compliance requirements, no matter where you do business.

With a single connection, you can receive real-time notifications to alert you of irregularities or data that fail to meet regulatory requirements. Combine that with the Digital Signature service, which ensures the integrity and authenticity of transactions, and E-archive to cover all your compliance needs.

Regardless of how many borders your operations cross, the Pagero network reach and services give you full transparency, audit capability and visibility via a single platform.

Additional features

Compliance

Pagero's Regulatory Affairs team ensures business compliance with local regulations.

E-archive

Digital and compliant storage of all exchanged business documents.

Digital Signature

Fulfil the local I&A requirements in countries where you operate.

Analytics

Access complete and accurate sales data in real time.

Validation

Ensure all outgoing documents fulfil recipient requirements.

Enrichment

We help you fulfil customer content requirements with no manual intervention.

Since moving over to e-invoicing, we have seen considerable delivery cost savings and a strong reduction in aged debt and payment cycles.
