RICOH CloudStream

Empower your organisation with secure print, scan and device management in the cloud

Reimagine print infrastructure with RICOH CloudStream

Managing print infrastructure shouldn't slow your IT team down. RICOH CloudStream brings print, scan and device management together in a single secure cloud platform. It helps you reduce complexity, strengthen print security and gain visibility across your entire print infrastructure.

Whether you're managing Ricoh or mixed fleets, RICOH CloudStream gives you the control and flexibility to modernise your print and document infrastructure with a scalable, easy to manage and cost-effective solution.

The advantages of RICOH CloudStream

Reduce the burden on IT departments

Reduce the time and effort spent managing print infrastructure. With a single cloud-native, serverless architecture, RICOH CloudStream **eliminates the need for on-premises print servers** while simplifying the management of multi-vendor environments.

A Universal Print Driver **removes print driver management**, while automatic updates **simplify deployment and ongoing administration**. Support for Windows Protected Print (WPP), ARM64 devices and other modern workplace technologies helps organisations adopt evolving IT standards with confidence.

Enhanced security

Protect your organisation with enterprise-grade security built for today's environments. RICOH CloudStream **supports Zero Trust environments, strengthens governance and control** through secure authentication (including MFA and OIDC integration) as well as audit logs, activity tracking and SIEM integration.

Your data is encrypted in transit and at rest, with continuous security updates and vulnerability assessments. **SOC 2 Type II certification** ensures a strong approach to security, compliance and risk management.

Manage costs effectively

By removing on-premises servers and reducing administrative overhead, RICOH CloudStream helps you control costs and avoid unexpected spend. **Support for multi-vendor devices** also means you can maximise your existing investments, allowing you to **modernise at your own pace without costly infrastructure replacement**.

Optimised for efficiency

Gain greater visibility, improve uptime and reduce the effort needed to manage print devices across your organisation. RICOH CloudStream provides **real-time device status monitoring, alerts** and **remote configuration capabilities**, helping your IT teams identify issues faster and **maintain consistent device performance**. Firmware updates, application deployment and device policies can be managed remotely through a single platform, while compliance monitoring helps ensure devices are compliant with business standards.

Integration with **RICOH @Remote** further enhances operational efficiency through **automated meter collection, toner replenishment** and **proactive service support** in one integrated platform.

Accelerate digital workflows

Turn paper documents into searchable, business-ready digital content with cloud-based scanning and document workflows. RICOH CloudStream helps organisations capture, process and route information through custom scan workflows.

Advanced capabilities such as **OCR, metadata capture, text redaction, barcode recognition and a wide range of connectors help automate document handling** and improve information flow. With seamless delivery to business applications and cloud storage services, organisations reduce manual effort, boost productivity and support digital transformation.

Choose RICOH CloudStream to modernise print, scan and device management with a secure cloud platform designed for your modern workplace.

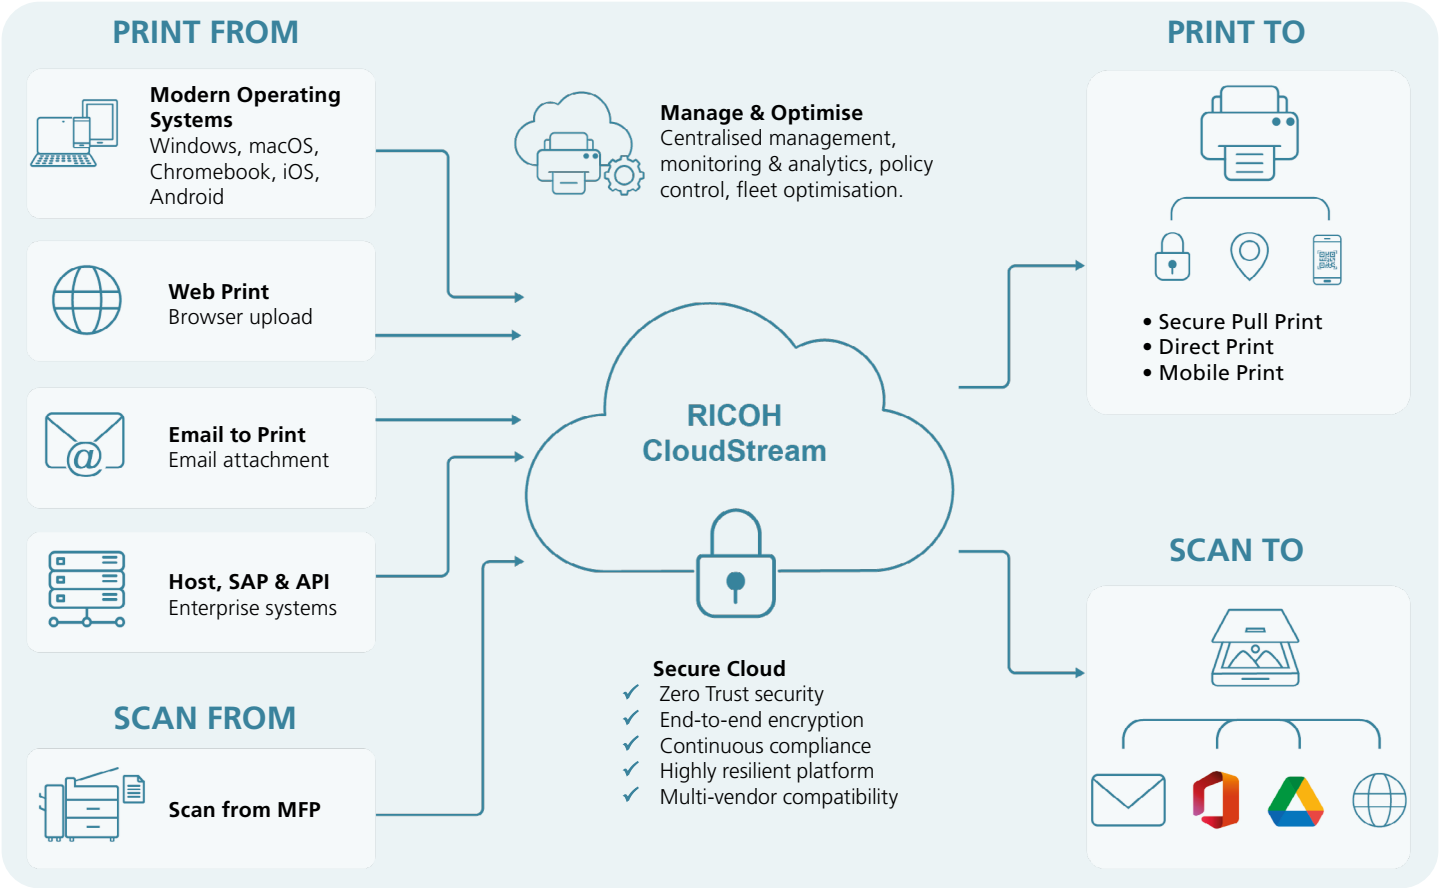
Improve visibility and sustainability

Gain actionable intelligent insights through comprehensive reporting and analytics. RICOH CloudStream provides **visibility into device status** and **usage, power consumption** and **print and scan activity**, helping you make informed decisions, optimise your print environment and support your sustainability initiatives.

Deliver a better user experience

Provide a seamless, flexible and secure user experience across hybrid work environments. RICOH CloudStream enables users to **print and capture information securely and with ease** through user authentication, location aware printing, mobile and guest printing and custom scan workflows.

It doesn't matter what device users work from, their role or the location, RICOH CloudStream provides an **automated, seamless and engaging experience for printing and scanning**.



RICOH CloudStream checklist

- ✓ Secure Pull Printing
- ✓ Direct Printing
- ✓ Mobile Printing
- ✓ Guest Printing
- ✓ CloudStream Universal Print Driver
- ✓ Location Aware Printing
- ✓ Multiple Scan Destinations
- ✓ OCR & Document Processing
- ✓ Scan Workflow Automation
- ✓ Device Status Monitoring
- ✓ Device Configuration
- ✓ Device Firmware Deployment
- ✓ Embedded Application Management
- ✓ Device Policies & Compliance Management
- ✓ Device Reporting
- ✓ Ricoh @Remote Integration
- ✓ Business Reporting & ESG Analytics
- ✓ Identity & Access Management
- ✓ Role-based Access Control
- ✓ Zero Trust Security
- ✓ Data Encryption
- ✓ Cloud-native SaaS Platform
- ✓ Multi-vendor Support
- ✓ Microsoft Integration

RICOH CloudStream is more than a print solution. It's a complete cloud platform that brings together print, scan, device management and reporting in one place.

Designed to support hybrid working, multi-vendor environments and evolving security requirements, it helps you simplify operations while supporting your wider digital transformation goals.
